

<b>Aj</b>	Authenticator of Terminal <b>J</b>	<b>L</b>	License, Certificate
<b>Ao</b>	Certificate Module	<b>Li</b>	License, Certificate issued to <b>I</b>
<b>Bi</b>	Token of User <b>I</b>	<b>LE</b>	Certificate of key <b>E</b>
<b>Co</b>	System Master Common Key	<b>LV</b>	Certificate of key <b>V</b>
<b>Ci</b>	Common Key of User <b>I</b> , symmetric key	<b>M</b>	Plaintext
<b>Di</b>	Private Decryption Key of User <b>I</b> , asymmetric key	<b>Mi</b>	Plaintext to or from User <b>I</b>
		<b>Ni</b>	ID# of User <b>I</b>
<b>Ei</b>	Public Encryption Key of User <b>I</b>	<b>NR</b>	Random Number
<b>F</b>	Unique Feature	<b>O</b>	System Authority
<b>Fi</b>	Unique Feature of User <b>I</b>	<b>P</b>	Ciphertext
<b>F1</b>	First Unique Feature (PIN/Password)	<b>Pi</b>	Ciphertext of User <b>I</b>
<b>F2</b>	Second Unique Feature (Biometrics)	<b>Qi</b>	Challenge Message sent to User <b>I</b>
<b>G</b>	Value of Mode Counter	<b>Ri</b>	Response Message from User <b>I</b>
<b>G1</b>	Value of Mode 1 Counter	<b>Si</b>	Signing Key of <b>I</b>
<b>G2</b>	Value of Mode 2 Counter	<b>So</b>	Signing Key of <b>O</b>
<b>G3</b>	Value of Mode 3 Counter	<b>TC</b>	Expiration Date of <b>Ci</b>
<b>G4</b>	Value of Mode 4 Counter	<b>TE</b>	Expiration Date of Certificate <b>LE</b>
<b>H</b>	Authentication Reference	<b>TL</b>	Logon Time
	Hash Value of Unique Feature		
<b>H1</b>	Hash Value of PIN or Password <b>F1</b>	<b>TM</b>	Mode Expiration Period
<b>H2</b>	Feature Vector of Biometrics <b>F2</b>	<b>TP</b>	Present Time
<b>I</b>	User	<b>TV</b>	Expiration Date of Certificate <b>LV</b>
<b>J</b>	Local Terminal	<b>Ui</b>	Message Authorized by <b>I</b> , signed by <b>Si</b>
<b>K</b>	Key <b>C, D, E, S, V</b>	<b>Vi</b>	Verification key of <b>I</b>
<b>K {M}</b>	Cryptographic Operation <b>M</b> is encrypted by <b>K</b>	<b>Vo</b>	Verification key of <b>O</b>

FIG 1: Notation

(201)  $P = K \{M\}$                        $M$  is encrypted by  $K$

(202)  $M = K \{P\}$                        $P$  is decrypted by  $K$

(203)  $TP - TL \leq TM$

(204)  $G > 0$

(205)  $Ci = Co \{Ni + TC\}$

(207)  $LEi = So \{Ni, Ei, TE\}$

(208)  $Vo \{LEi\} \Rightarrow Ni, Ei, TE$

(209)  $LVi = So \{Ni, Vi, TV\}$

(210)  $Vo \{LVi\} \Rightarrow Ni, Vi, TV$

(211)  $Qi = NR + TP$

(212) or  $Qi = Mi + TP$

(213)  $Ri = Ci \{Qi\}$

(214)  $Ci \{Ri\} \Rightarrow Qi$

(215)  $Ri = Di \{Qi\}$

(216)  $Ei \{Ri\} \Rightarrow Qi$

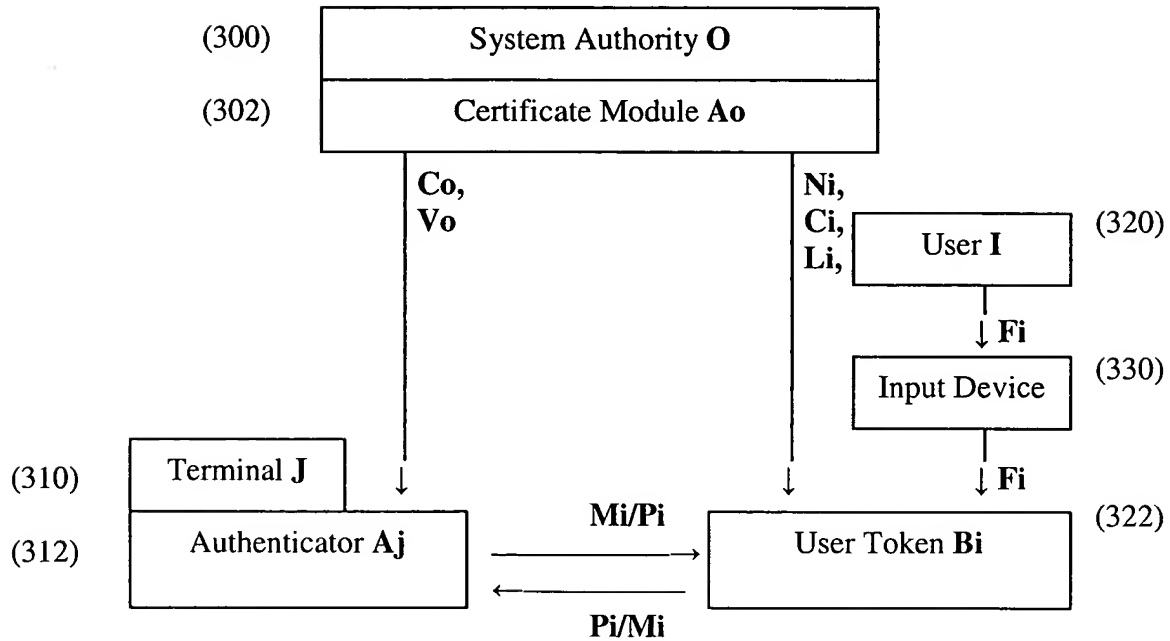

(217)  $Pi = Ei \{Mi\}$

(218)  $Mi = Di \{Pi\}$

(219)  $Ui = Si \{Mi\}$

(220)  $Vi \{Ui\} \Rightarrow Mi$

FIG 2: Formulae

**Ci** Common Key of User I, symmetric key  
**Co** System Master Common Key  
**Fi** Unique Feature of User I  
**Li** License, Certificate issued to User I  
**Mi** Plaintext to or from User I  
**Ni** ID# of User I  
**Pi** Ciphertext of User I  
**Vo** Verification key of O

FIG 3: Block Diagram of the System of This Invention

Patent Application of Y. Tsukamura for  
“Multi-Mode Token” continued  
21

Mode	Logon Expiration Period TM	Application Security Level
0	No Limit	No Security
1	1 week	Low
2	1 day	Middle
3	1 sign	High
4	1 sign	Highest

FIG 4: An Example of the Modes of a Multi-Mode Token

Register Name	Value in Register
Logon Time Register	<b>TL</b>
Mode 1 Counter	<b>G1</b>
Mode 1 Expiration Period	<b>TM1</b>
Mode 2 Counter	<b>G2</b>
Mode 2 Expiration Period	<b>TM2</b>
Mode 3 Counter	<b>G3</b>
Mode 4 Counter	<b>G4</b>

FIG 5: The Register & Counter values of a Multi-Mode Token

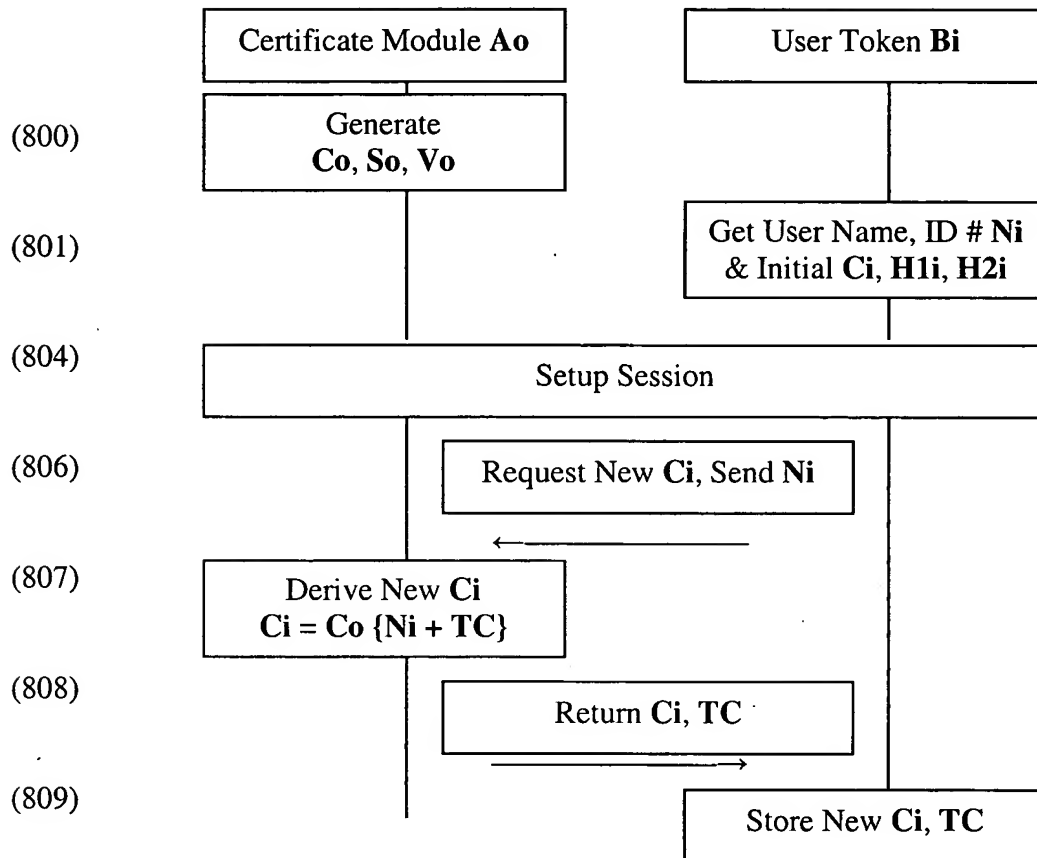

Item	Notation & Data	Secret
User Name		
Token ID #	<b>Ni</b>	
Common Key	<b>C</b>	X
Expiration Date of <b>C</b>	<b>TC</b>	
Private Decryption Key	<b>D</b>	X
Public Encryption Key	<b>E</b>	
Certificate of <b>Ei</b>	<b>LE</b>	
Expiration Date of <b>LE</b>	<b>TE</b>	
Private Signing Key	<b>S</b>	X
Public Verification Key	<b>V</b>	
Certificate of <b>V</b>	<b>LV</b>	
Expiration Date of <b>LV</b>	<b>TV</b>	
Public Verification Key of <b>O</b>	<b>Vo</b>	
Authentication Reference		
Hash Value of PIN or Password	<b>H1</b>	X
Feature Vector of Biometrics	<b>H2</b>	X

FIG 6: A Table of the Basic User Data Stored in a Multi-Mode Token

Mode	Crypt Key	Crypt Operand bit	Usage Condition			Application			
			Logon	Access Times G max	Expiration Period TM	Decrypt	Sign for		
							Authentication	Payment	Authorization
0	N/A	N/A	Free						
1	C	No Limit	F1 or F2	10	1 week		Low		
2	D	< 1024	F1 or F2	5	1 day	Session Key, File Key	High	Micro	
3	S	≤ 64	F1 or F2	1	1 session			Regular	Regular
4	S	> 64	F1 and F2	1	1 session			Large	Important

FIG 7: An Example of Multi-Mode Settings

Patent Application of Y. Tsukamura for  
 "Multi-Mode Token" continued  
 25

**Ci** Common Key of User **I**, symmetric key  
**Co** System Master Common Key  
**H1i** Hash Value of PIN or Password  
**H2i** Feature Vector of Biometrics  
**So** Signing Key of **O**  
**TC** Expiration Date of **Ci**  
**Vo** Verification Key of **O**  
**{ }** Cryptographic Operation

FIG 8A: Initialization Flow of Token

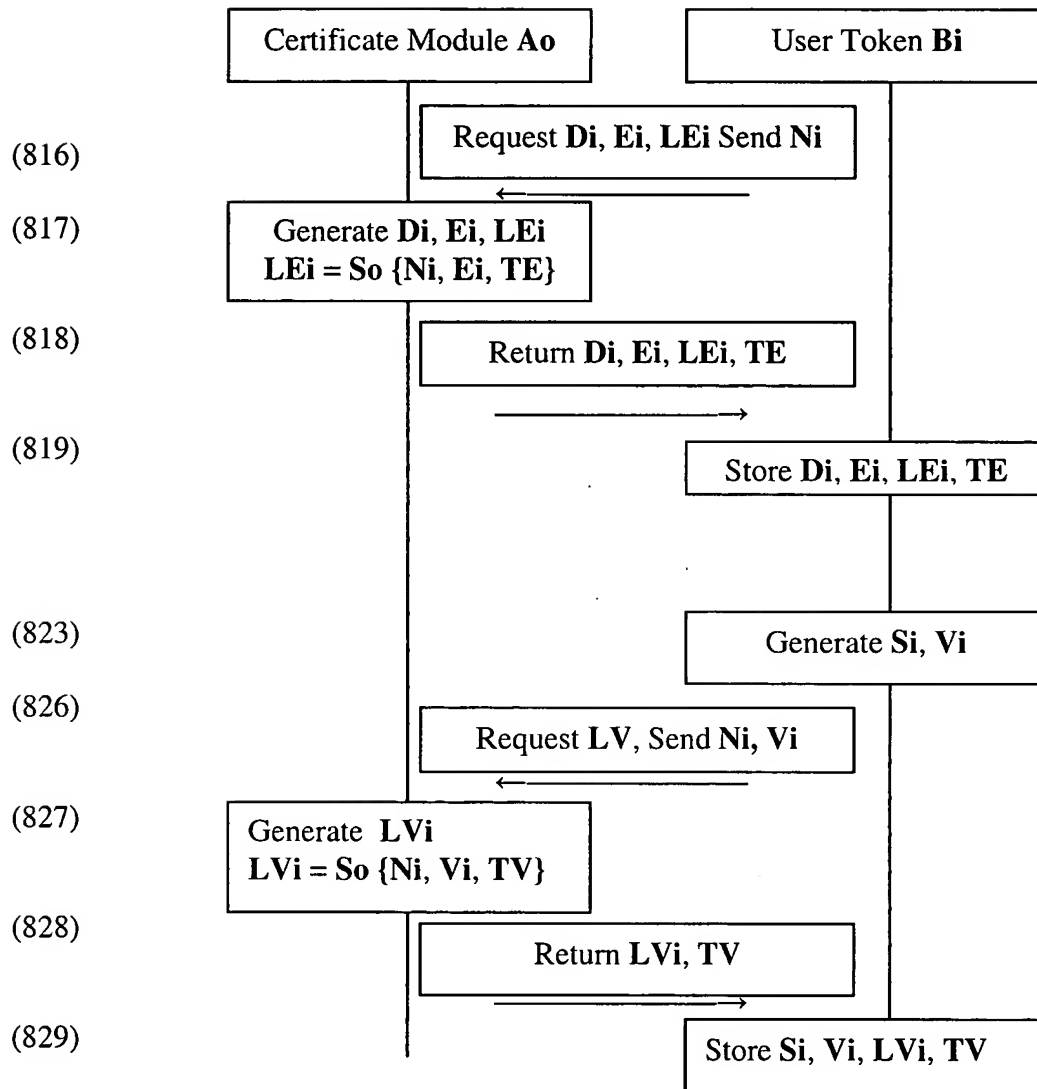

FIG 8B: Initialization Flow of a Token (continued)

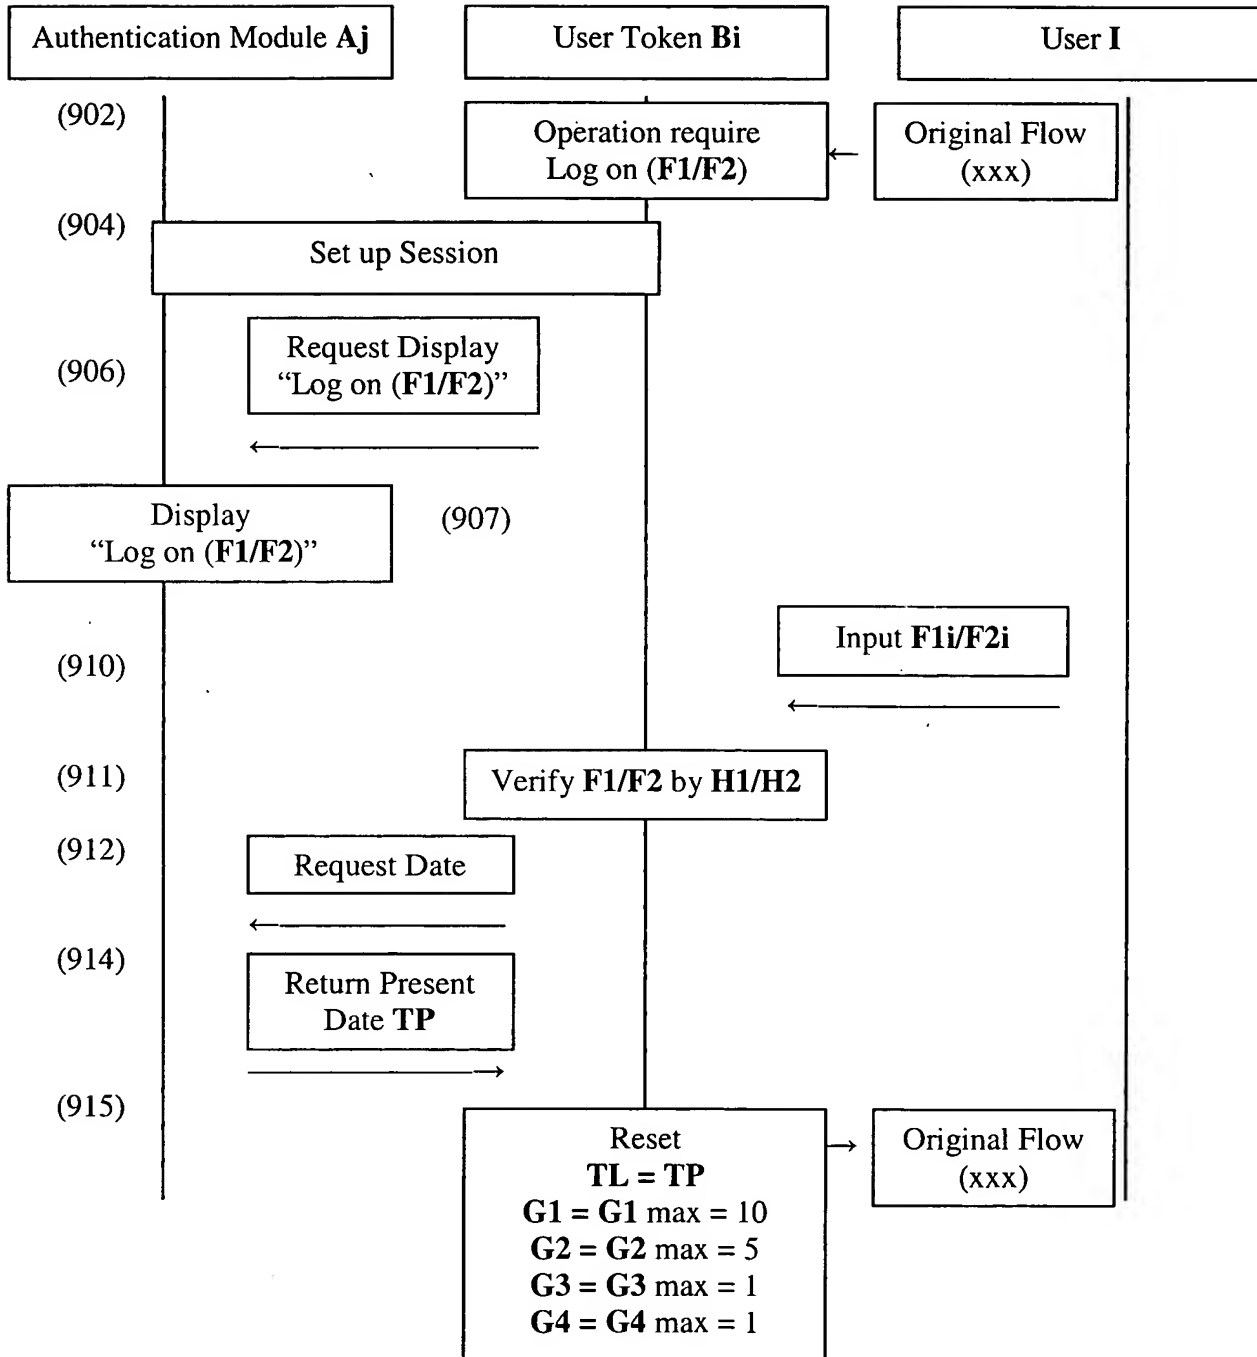

FIG 9: Flow of Multi-Mode Token Logon

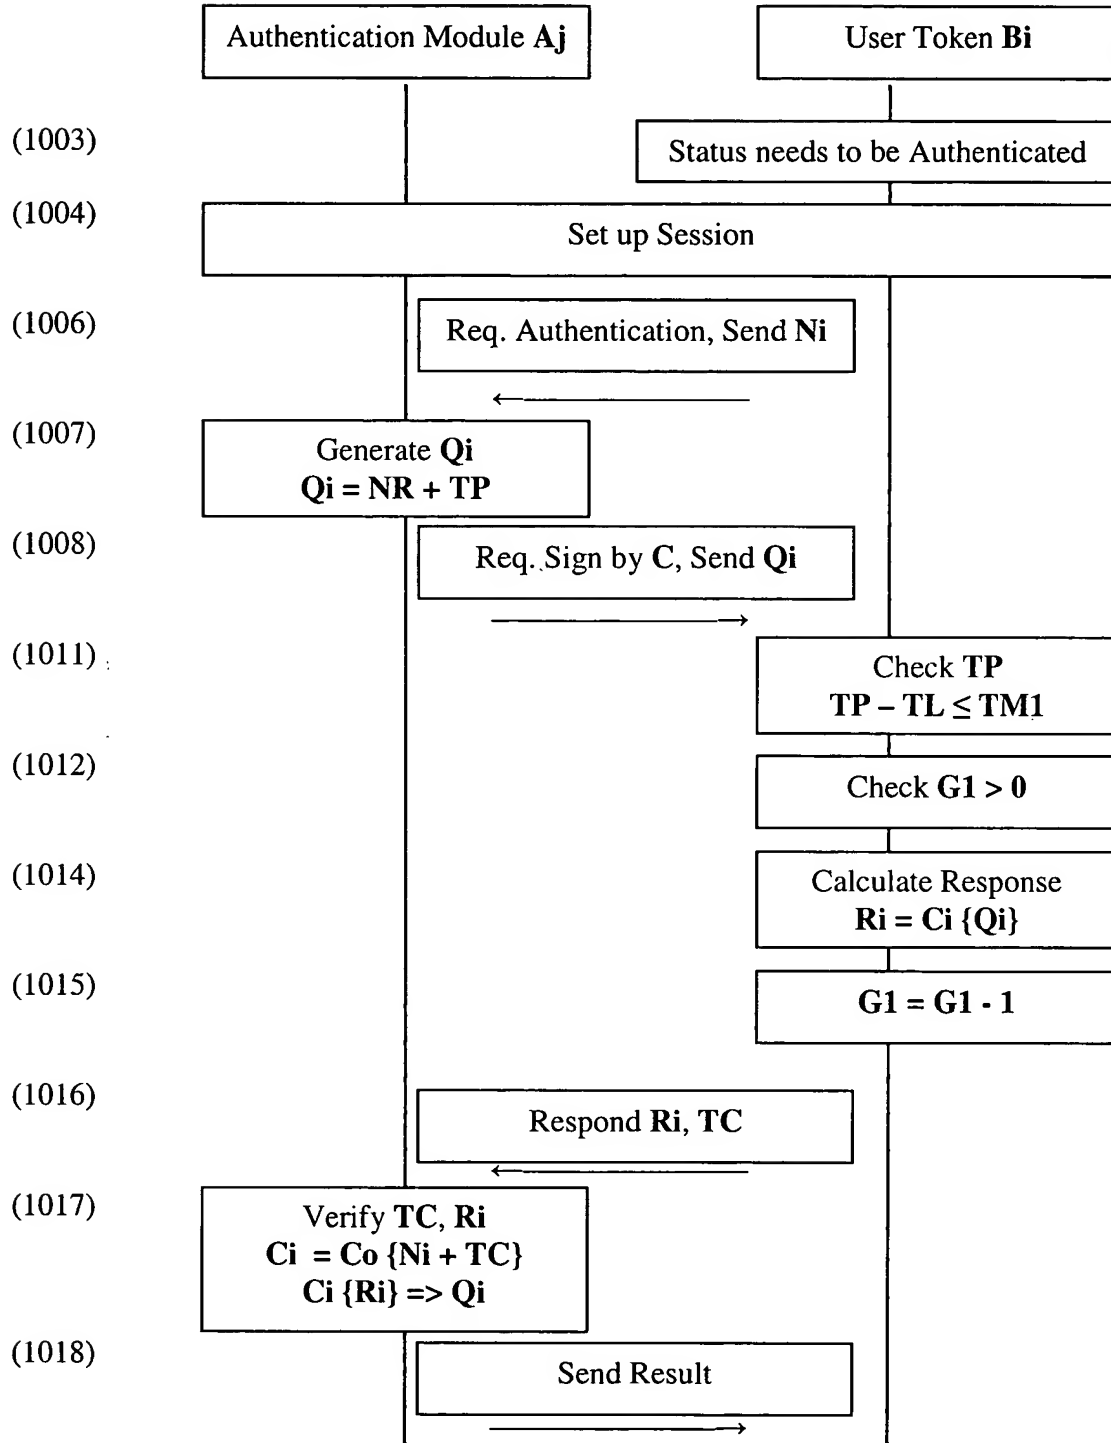

FIG 10: Flow of Mode 1 Operation

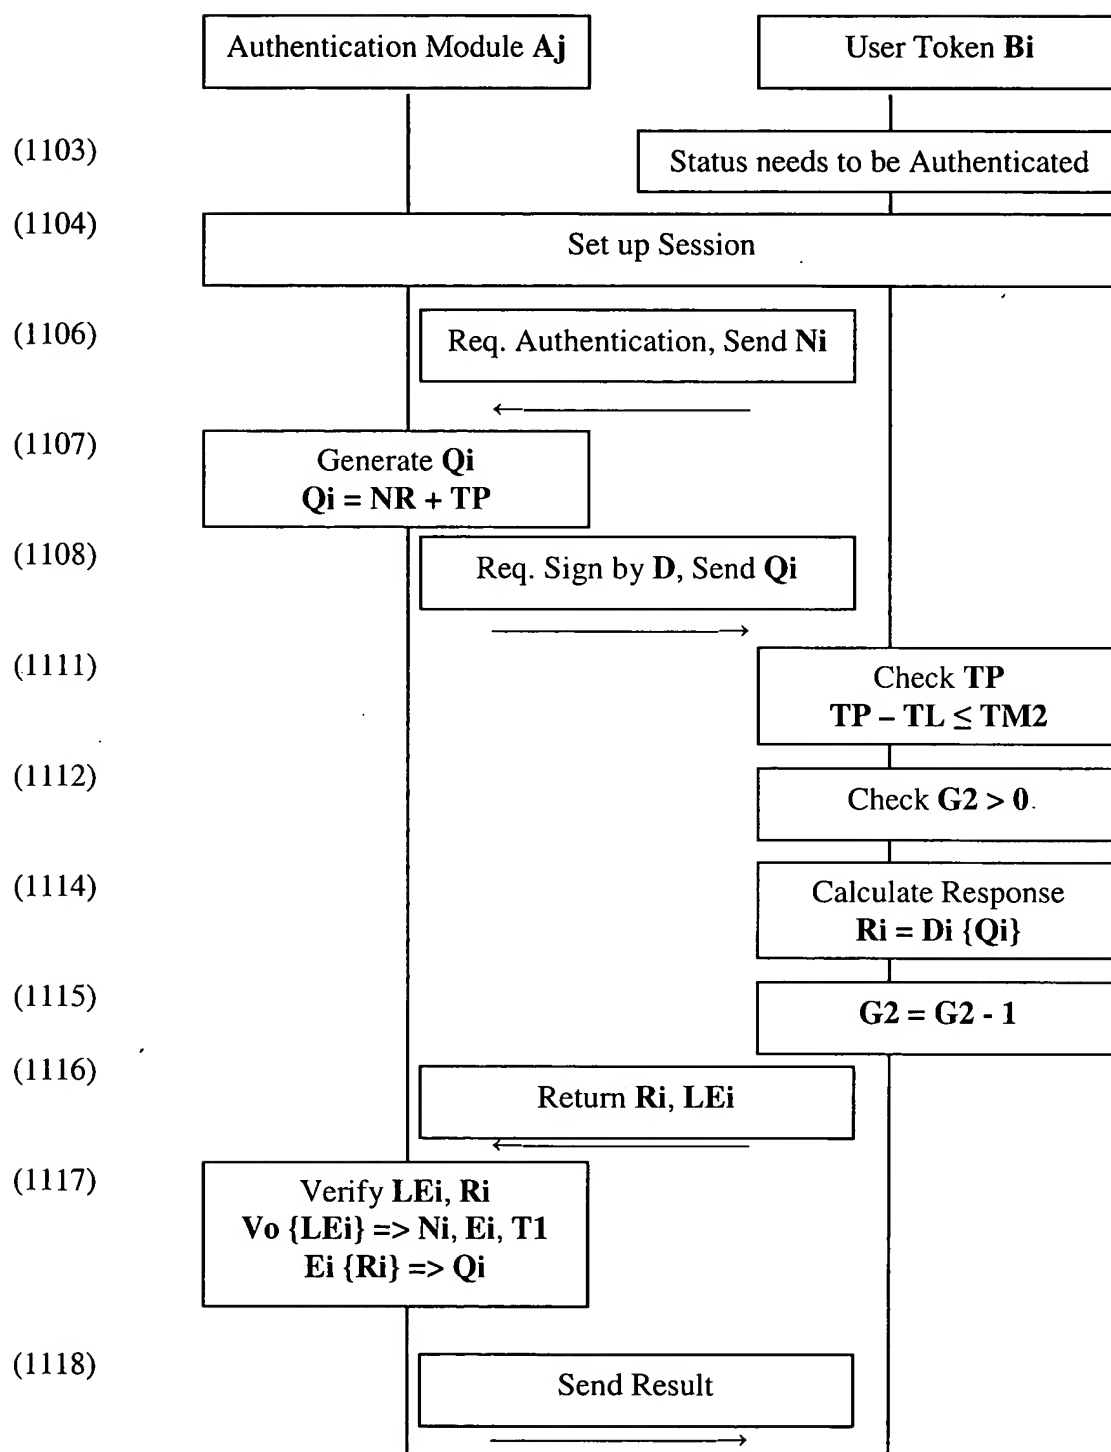

FIG 11: Flow of Mode 2, Authentication

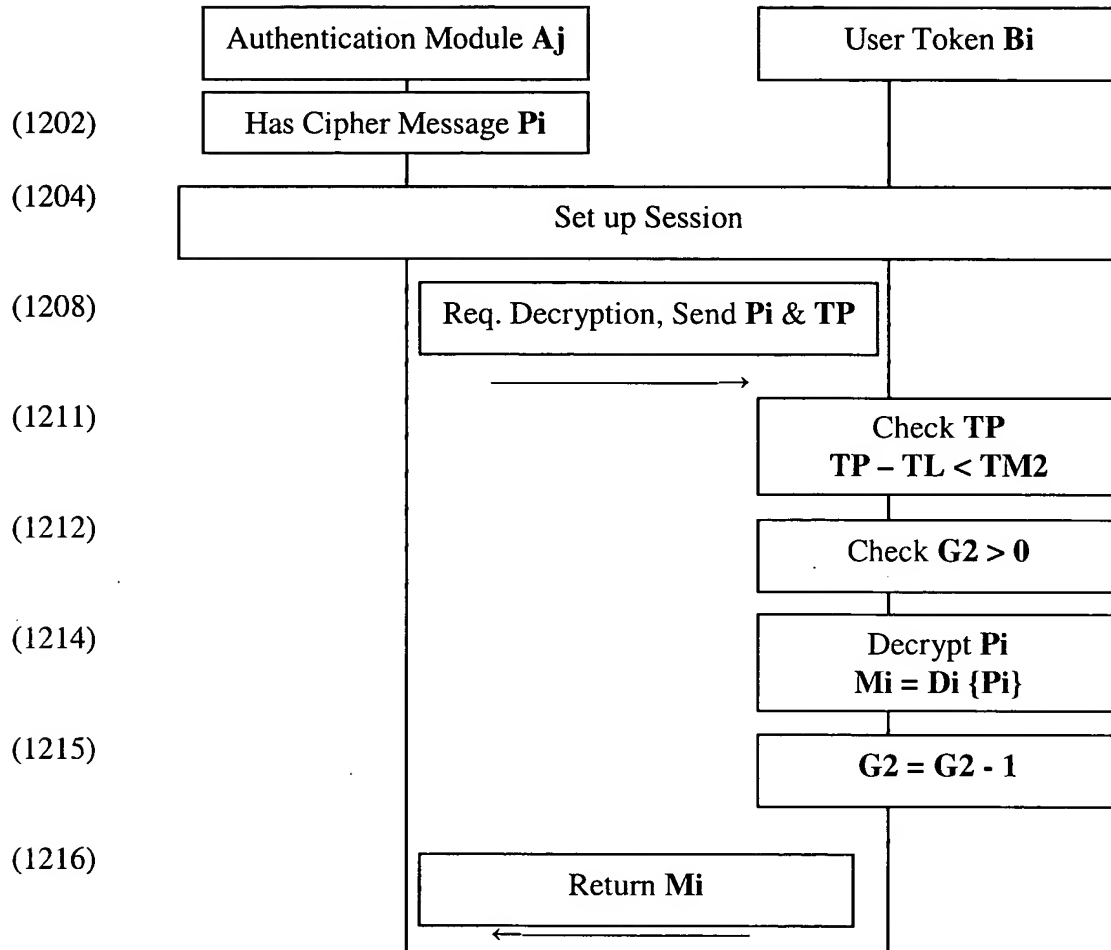

FIG 12: Flow of Mode 2, Decryption

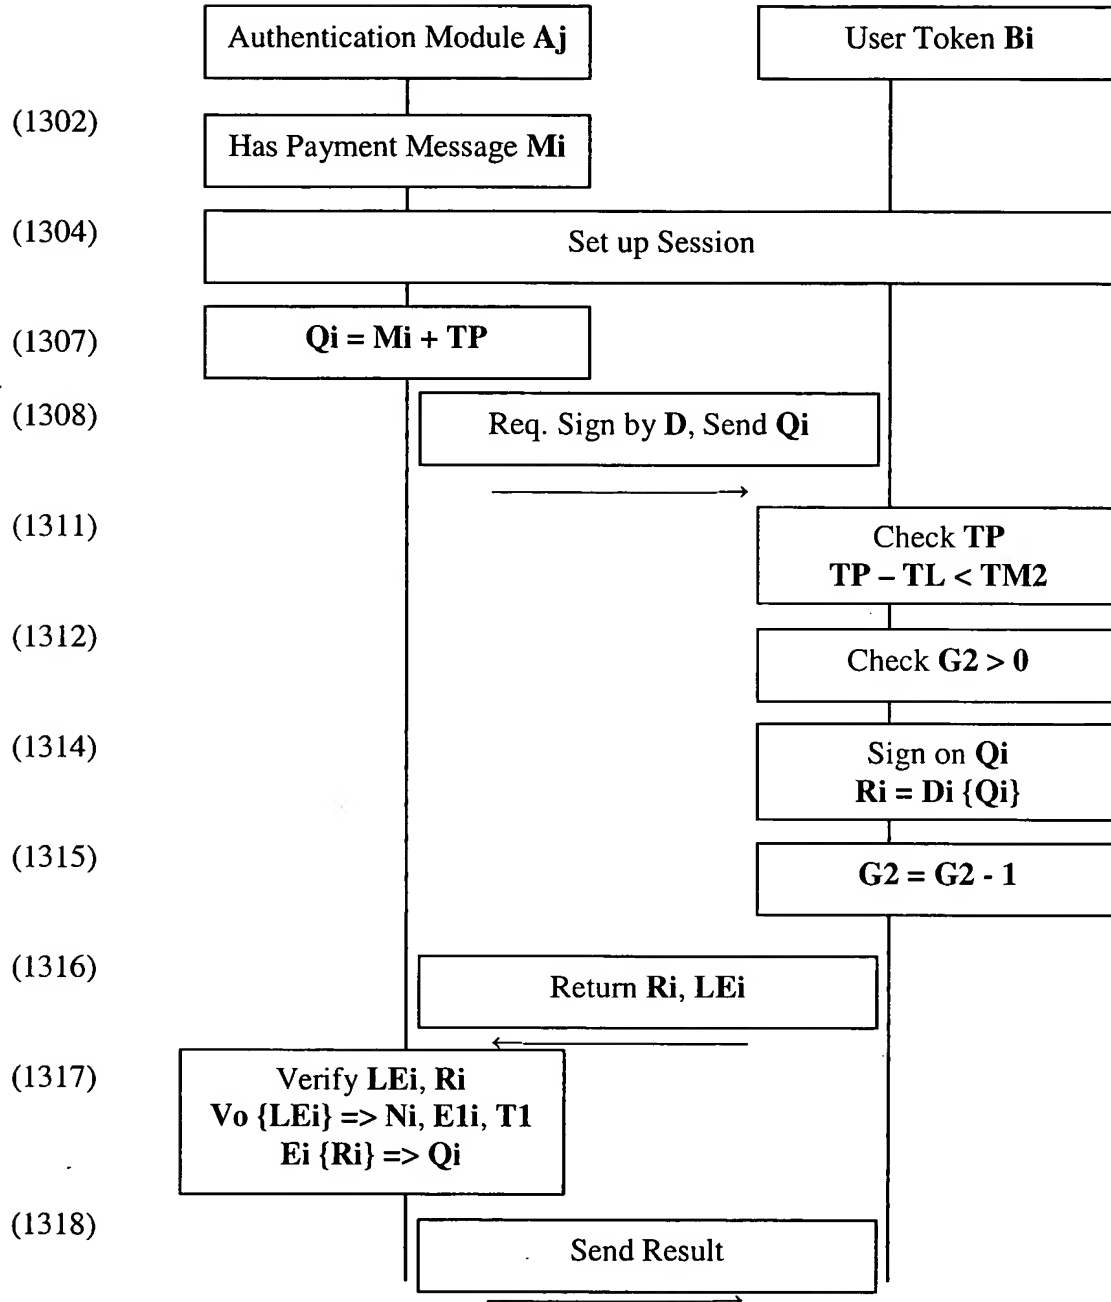

FIG 13: Flow of Mode 2, Payment

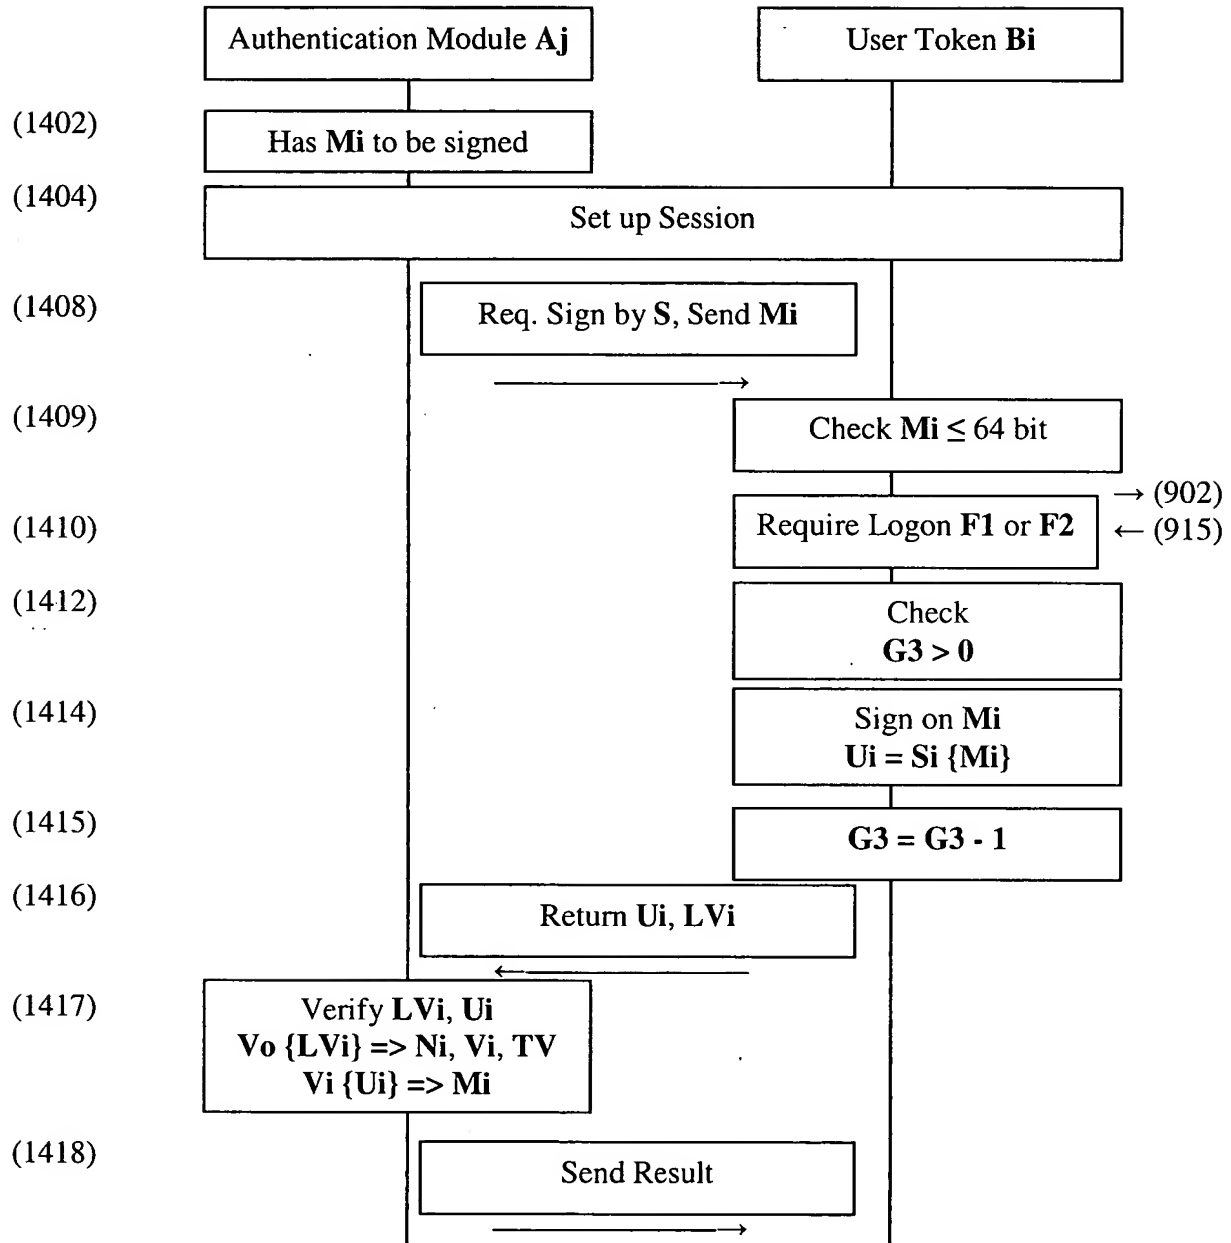

FIG 14: Flow of Mode 3 Payment/Authorization

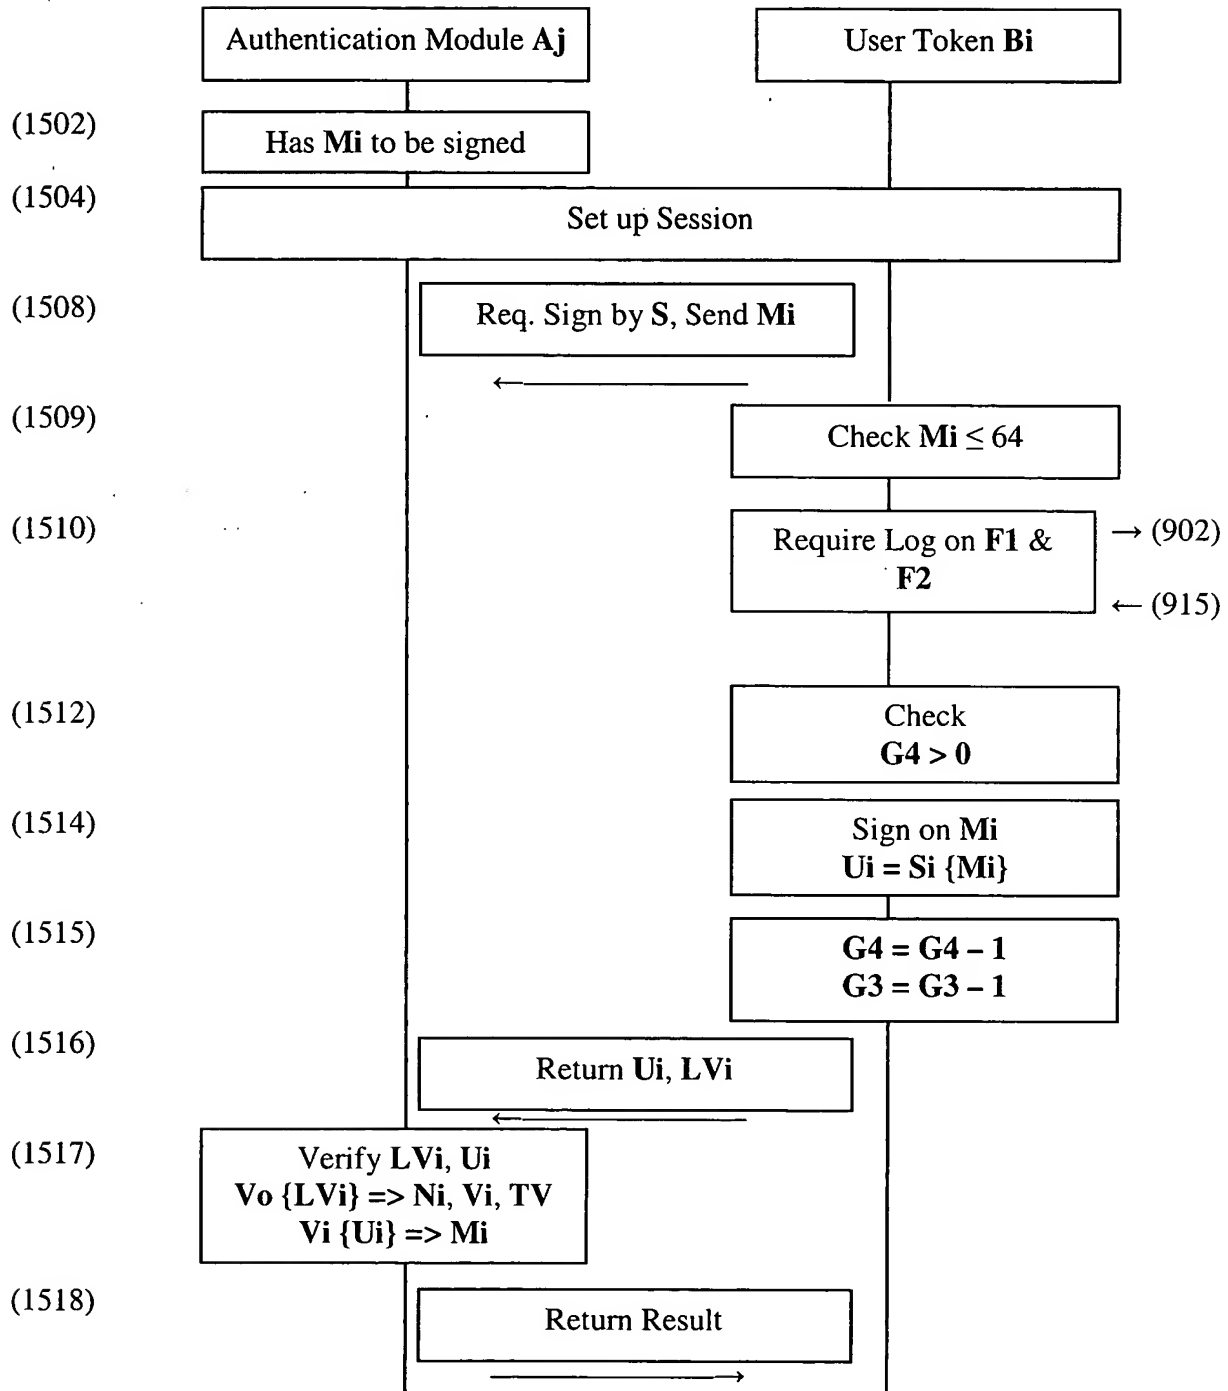

FIG 15: Flow of Mode 4 Payment/Authorization
